

Fluence to Exhibit its Latest Technologies at SIWW 2018

July 9-11, Singapore. Booth B2-P32.

Visit Fluence, Frost & Sullivan's Global Decentralized Water & Wastewater Treatment Company of 2018, at booth B2-P32 to meet our experts who'll share onsite demos of our efficient, effective and highly sustainable solutions. Fluence will showcase our latest solutions in water, wastewater and waste-to-energy.

Municipal Wastewater Treatment

Fluence's advanced MABR (Membrane Aerated Biofilm Reactor) wastewater treatment technology uses simultaneous nitrification and denitrification to treat nitrogen and phosphorus, with a reduction in energy consumption of up to 90% over traditional treatment methods. Packed in compact containerized systems, it provides efficient on-site treatment that meets the strictest discharge regulations. At SIWW, Fluence will display its Aspiral™ smart packaged wastewater treatment solution, and SUBRE, its retrofit solution to increase capacity and efficiency, both based on the innovative MABR technology.

Waste-to-Energy Solutions

To guarantee the long-term sustainability of resources, Fluence offers innovative waste-to-energy solutions that treat wastewater and produce energy. Fluence customizes its anaerobic digestion solutions for a variety of industries, including dairy farms, meat processing plants, and paper companies, as well as a new advanced anaerobic reactor configuration that makes the most of renewable energy production, while producing a high-quality effluent.

Water Treatment

With its NIROBOX™ line, Fluence offers the most compact water treatment solutions, that allow decentralized desalination systems to be deployed to supply local populations and industries with high quality water at a viable cost. Unlike large-scale desalination plants, NIROBOX containerized units offer a fast 'time-to-water' and can be deployed in weeks, rather than years.

Our CTO, Ronen Schechter, will be presenting on the topic of Simultaneous Nitrogen and Phosphorous Removal in an Energy Efficient MABR without Internal Circulation at 15:30. We also invite you to join Fluence on Tuesday, July 10 at 18:00 for Industry Night. Let our experts help you find the perfect solution to solve your water problems.

About Fluence Corporation Limited (ASX: FLC)

Fluence has experience operating in over 70 countries worldwide and employs more than 300 highly trained water professionals around the globe. The Company provides local, sustainable treatment and reuse solutions, while empowering businesses and communities worldwide to make the most of their water resources.

Fluence offers an integrated range of services across the complete water cycle, from early stage evaluation, through design and delivery to ongoing support and optimization of water related assets. With established operations in North America, South America, the Middle East and Europe, Fluence is also expanding into China's rural wastewater treatment market.

Global consultancy Frost and Sullivan recently awarded Fluence Corporation "2018 Global Decentralized Water and Wastewater Treatment Company of the Year", noting in their award dissertation:

"While typical decentralized water treatment systems are relatively expensive, complicated, and inefficient, Fluence Corporation leverages innovative and smart technology solutions backed by decades of industrial know-how to excel in water and wastewater treatment solutions. Fluence's excellence becomes apparent through its success, as the company continues to expand its existing offerings as well as partnerships with other prominent companies in the industry. With its easy to use, sustainable, smart and cost-effective solutions as well as a remarkable year of growth, innovation, and leadership, Fluence Corporation earns Frost & Sullivan's 2018 Global Company of the Year Award in the decentralized water and wastewater treatment industry."
