

Fluence receives another Aspiral™ bulk order with partner ITEST in China

*40 additional Aspiral™ units to be deployed at toll stations, parking lots and service areas
Plants will treat wastewater to Class 1A standards across the highway system in Hubei Province
Third contract under existing partnership agreement*

Melbourne, New York 28 March 2018

Fluence Corporation Limited (ASX: FLC) is pleased to announce that it has signed a third contract under its three year strategic partnership agreement with ITEST. This agreement relates to the supply of Fluence's Aspiral™ Smart Packaged wastewater treatment plants along the five highway systems in Hubei Province covered under ITEST's contractual scope.

Fluence will supply an additional 40 Aspiral™ Smart Packaged wastewater treatment plants (L4 and S1 models) for sites along highways, with anticipated delivery by May 2019. The L4 models will be deployed at parking lots and service areas and will treat up to 200 m³/day of wastewater. The S1 models will be deployed at toll stations and will treat up to 75 m³/day. The wastewater will be treated to the required Class 1A wastewater standard.

Fluence Managing Director and CEO Henry Charrabé said: "Our partnership with ITEST continues to grow, with this third volume contract following previously announced orders in December 2018 for 35 Aspiral™ units to be deployed across 13 sites. ITEST has now verified the performance of both Aspiral™ S1 and L4 models and is satisfied with their ability to deliver consistent, high-quality wastewater treatment. This further reaffirms our customer's confidence in the MABR technology and Fluence's expertise in delivering volume orders in a timely and efficient manner."
