

Workforce Housing

Flexible Water Solutions for Workforce Housing

Flexible. Modular. Rapidly Deployable.

Remote workforce housing needs reliable water and wastewater treatment, even when municipal infrastructure is unavailable or project timelines are short.

Fluence provides flexible, containerized treatment solutions to support worker communities in oil and gas, mining, construction, energy, and data center projects.

WATER & WASTEWATER TREATMENT

Reliable Water Supply: Treat freshwater, brackish water, or seawater for various uses, including drinking water.

On-Site Wastewater Treatment: Treat sewage near where it is generated, reducing reliance on off-site disposal.

Flexible Capacity: Scale treatment as workforce needs change.

Rental Options: Meet temporary treatment needs without major upfront capital investment.

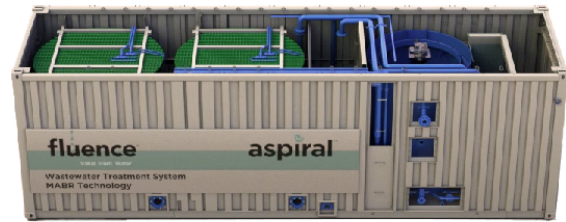

Solutions for Remote Workforce Housing

Nirobox™ | Niroflex™

Water Treatment

Aspiral™

Wastewater Treatment

Common Industries

Oil and Gas

Provide water and wastewater treatment for remote oilfield camps with limited access to municipal infrastructure.

Mining

Help meet water supply and wastewater treatment needs at remote mining sites where freshwater resources may be limited.

Construction and Infrastructure

Deploy treatment systems quickly to support temporary worker accommodation and changing project requirements.

Energy and Data Centers

Provide supplemental treatment capacity for workforce housing during construction and other project phases.

The Fluence Advantage

1,000+ projects | 70+ countries | 20+ years of experience

Fluence combines proven treatment technologies with global manufacturing and project execution capabilities to deliver practical, scalable water and wastewater solutions.
